# FRASAC

## Data Breach Policy

Fife Rape and Sexual Assault Centre (FRASAC) collects, holds, processes, and shares personal data, a valuable asset that needs to be suitably protected.

Every care is taken to protect personal data from incidents (either accidentally or deliberately) to avoid a data protection breach that could compromise security.

Compromise of information, confidentiality, integrity, or availability may result in harm to individual(s), reputational damage, detrimental effect on service provision, legislative noncompliance, and/or financial costs.

### 1. Purpose and Scope

FRASAC is obliged under Data Protection legislation<sup>1</sup> to have in place an organisational framework designed to ensure the security of all personal data during its lifecycle, including clear lines of responsibility.

This policy sets out the procedure to be followed to ensure a consistent and effective approach is in place for managing data breach and information security incidents.

This policy relates to all personal and special categories (sensitive) data held by FRASAC regardless of format.

This policy applies to all employees, volunteers, and students at FRASAC. This includes temporary, casual or agency staff and contractors, consultants, suppliers, and data processors working for, or on behalf of FRASAC.

The objective of this policy is to contain any breaches, to minimise the risk associated with the breach and consider what action is necessary to secure personal data and prevent further breaches.

### 2. Definitions / Types of Breach

For the purpose of this policy, data security breaches include both confirmed and suspected incidents.

An incident in the context of this policy is an event or action which may compromise the confidentiality, integrity or availability of systems or data, either accidentally or deliberately, and has caused or has the potential to cause damage to FRASAC's information assets and/or reputation.

An incident includes, but is not restricted to, the following:

---

<sup>1</sup> The General Data Protection Regulation (GDPR) and related EU and national legislation

- loss or theft of confidential or sensitive data or equipment on which such data is stored (e.g. loss of laptop, USB stick, iPad / tablet device, or paper record);
- Equipment theft or failure.
- System failure.
- Unauthorised use or access to or modification of data on information systems.
- Attempts (failed or successful) to gain unauthorised access to information or IT system(s).
- Unauthorised disclosure of sensitive / confidential data.
- Website defacement.
- Hacking attack.
- Unforeseen circumstances such as a fire or flood.
- Human error.
- Blagging' offences where information is obtained by deceiving the organisation who holds it.

### 3. Reporting an Incident

Any individual who accesses, uses, or manages FRASAC's information is responsible for reporting any data breach and information security incidents immediately to the FRASAC CEO.

If the breach occurs or is discovered outside normal working hours, it must be reported as soon as is practicable.

The report must include full and accurate details of the incident, when the breach occurred (dates and times), who is reporting it, if the data relates to people, the nature of the information, and how many individuals are involved. A Breach of Data Protection Incident Report Form (see Appendix) should be completed as part of the reporting process.

All staff should be aware that any breach of Data Protection legislation may result in FRASAC's Disciplinary Procedures being instigated.

### 4. Containment and Recovery

The CEO will firstly determine if the breach is still occurring. If so, appropriate steps will be taken immediately to minimise the effect of the breach.

An initial assessment will be made by the CEO in liaison with relevant staff/volunteers/board members to establish the severity of the breach. The CEO will assess the risks associated with the breach, for example, the potential adverse consequences for individuals, how serious or substantial those are and how likely they are to occur.

The investigation will need to consider the following:

- The type of data involved.
- Its sensitivity.
- The protections are in place (e.g. encryptions).

- What has happened to the data (e.g. has it been lost or stolen).
- Whether the data could be put to any illegal or inappropriate use.
- Data subject(s) affected by the breach, number of individuals involved and the potential effects on those data subject(s).
- Whether there are wider consequences to the breach.

The CEO will establish whether there is anything that can be done to recover any losses and limit the damage the breach could cause. They will establish who may need to be notified as part of the initial containment and will inform the police, where appropriate.

Advice from experts may be sought in resolving the incident promptly.

The CEO will determine the suitable course of action to be taken to ensure a resolution to the incident.

## 5. Notification

The CEO in consultation with relevant colleagues will establish whether the Information Commissioner's Office will need to be notified of the breach, and if so, notify them within 72 hours of becoming aware of the breach, where feasible.

Every incident will be assessed on a case-by-case basis; however, the following will need to be considered:

- Whether the breach is likely to result in a high risk of adversely affecting individuals' rights and freedoms under Data Protection legislation<sup>2</sup>;
- Whether notification would assist the individual(s) affected (e.g. could they act on the information to mitigate risks?).
- Whether notification would help prevent the unauthorised or unlawful use of personal data.
- Whether there are any legal / contractual notification requirements.
- The dangers of over notifying. Not every incident warrants notification and over notification may cause disproportionate enquiries and work.

Individuals whose personal data has been affected by the incident, and where it has been considered likely to result in a high risk of adversely affecting that individual's rights and freedoms, will be informed without undue delay. Notification will include a description of how and when the breach occurred, and the data involved. Specific and clear advice will be given on what they can do to protect themselves and include what action has already been taken to mitigate the risks. Individuals will also be provided with a way in which they can contact FRASAC for further information or to ask questions on what has occurred.

---

<sup>2</sup> Individual Rights: <https://ico.org.uk/for-organisations/guide-to-the-general-data-protection-regulation-gdpr/individualrights/>

The CEO must consider notifying third parties such as the police, insurers, banks or credit card companies, and trade unions. This would be appropriate where illegal activity is known or is believed to have occurred, or where there is a risk that illegal activity might occur in the future.

The CEO will consider whether a press release should be developed and to be ready to handle any incoming press enquiries.

A record will be kept of any personal data breach, regardless of whether notification was required.

## 6. Evaluation and Response

Once the initial incident is contained, the CEO will carry out a full review of the causes of the breach; the effectiveness of the response(s) and whether any changes to systems, policies and procedures should be undertaken.

Existing controls will be reviewed to determine their adequacy, and whether any corrective action should be taken to minimise the risk of similar incidents occurring.

The review will consider:

- Where and how personal data is held and where and how it is stored.
- Where the biggest risks lie including identifying potential weak points within existing security measures.
- Whether methods of transmission are secure, sharing minimum amount of data necessary.
- Staff awareness.
- Implementing a data breach plan and identifying a group of individuals responsible for reacting to reported breaches of security.

If deemed necessary, a report recommending any changes to systems, policies and procedures will be considered by the Board of Directors.

## 7. Appendix

### FRASAC Data Breach Incident Form

Please use this form to report any data breach to FRASAC CEO or Chairperson on Board of Directors	
<b>Detail of person making report</b>	
Name	
Designation	
Date	
<b>Details of the data breach</b>	
When did the data breach occur (dates and times)?	
Does the data breach involve personal data?	
What is the nature of data breached? Is this special category data (sensitive data)?	
What categories and how many individuals are affected?	
What has happened to the data?	
Are there any protections in place (eg encryptions?)	
Has any action been taken to halt or mitigate the impact of the breach?	
Signed
